
Los Angeles Regional Water Quality Control Board

October 9, 2014

Mr. Everett Bole
DLA Installation Support - Energy
8725 John J. Klingman Road
Fort Belvoir, VA 22060

**SUBJECT: INCOMPLETE REVISED WORKPLAN FOR FURTHER EVALUATION OF
GROUNDWATER MONITORING WELL GMW-62 LIGHT NON-AQUEOUS
PHASE LIQUID (LNAPL) PLUME**

**SITE/CASE: DEFENSE FUEL SUPPORT POINT NORWALK, 15306 NORWALK BOULEVARD,
NORWALK, CALIFORNIA (SCP NO. 0286A, SITE ID NO. 16638)**

Dear Mr. Bole:

The California Regional Water Quality Control Board (Regional Board) received the technical document titled *Revised Workplan for Further Evaluation of GMW-62 LNAPL Plume* (Revised Workplan), dated July 28, 2014, prepared by The Source Group, Inc., on your behalf, for the above referenced site. On July 25, 2014, Regional Board commented on soil sampling and monitoring protocol after reviewing the June 26, 2014, *Workplan for Further Evaluation of GMW-62 LNAPL Plume*, prepared by SGI, and requested a workplan addendum to be submitted by August 31, 2014.

We have reviewed the Revised Workplan and determined that the Revised Workplan is incomplete because the comments from the Regional Board's July 25, 2014 were not addressed. We have commented on the soil sampling and monitoring that you should follow the approved protocol as specified in the April 11, 2011, *Concrete Demolition and Soil Confirmation Sampling Workplan* and addendum and that soil samples should be collected by an Encore sampler before taking photo ionization detector headspace measurements.

Therefore, submit a complete Revised Workplan to the Regional Board incorporating the above information by **November 15, 2014**.

If you have any questions, please contact Mr. Paul Cho at (213) 576-6721 (pcho@waterboards.ca.gov).

Sincerely,

Paul Cho, P.G.
Engineering Geologist
Site Cleanup Unit III
