Re: Request for Time Extension for to Submit Report
Further Evaluation of Well GMW-62 LNAPL
Defense Fuel Support Point Norwalk
15306 Boulevard, Norwalk, California
(SCP NO. 0286A, SITE ID NO. 16638)

Dear Mr. Cho,

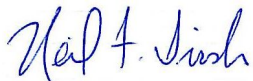

The RWQCB conditionally approved on March 16, 2015 the further investigation of GMW-62 LNAPL outlined in a *Revised Work Plan for Further Evaluation of GMW-62 LNAPL Plume* (GMW-62 Workplan; SGI, December 15, 2014). The investigation proposed in the GMW-62 work plan includes the installation of three monitoring wells with detailed soil coring and NAPL transmissivity testing.

Due to the increased level of testing of the cores and the time and expense required to complete the required NAPL evaluation, SGI has requested additional funds from Defense Logistics Agency-Energy (DLA Energy). The normal contracting award timelines are likely to result in a delay in the submittal of the report, and therefore, on behalf of DLA Energy, we are requesting a three-month extension for the submittal of the report of findings. The revised submittal date is proposed to be September 30, 2015.

If you have any questions or would like to discuss this extension request, please call me at (562) 597-1055.

Sincerely,

The Source Group, Inc.

Neil F. Irish, P.G. 5484
Principal Geologist
