
Los Angeles Regional Water Quality Control Board

November 24, 2015

Mr. Nicholas Carros
DLA Installation Support – Energy
8725 John J. Klingman Road
Fort Belvoir, VA 22060

SUBJECT: REVIEW OF PHASE 4 EXCAVATIONS AND STOCKPILES SAMPLING REPORT

CASE/SITE: DEFENSE FUEL SUPPORT POINT NORWALK, 15306 NORWALK BOULEVARD, NORWALK, CALIFORNIA (SCP NO. 0286A, SITE ID NO. 16638)

Dear Mr. Carros:

On November 4, 2015, the California Regional Water Quality Control Board (Regional Board) received a technical document titled *Phase 4 Report and Request for Soil Reuse* (Report), prepared by Source Group, Inc. (SGI), on behalf of Defense Logistics Agency (DLA), for the above referenced site (Site). This Report proposes to reuse treated soil and assumed clean soil stockpiles for the Site's redevelopment.

We have reviewed the Report and have the following comment:

- The sampling results of three soil confirmation samples from soil stockpiles C-CS-06-EX06-SP01 and C-CS-17-EX15-SP01 exceed the Site's soil cleanup goals for total petroleum hydrocarbons and volatile organic compounds. The Report proposes that the sections of stockpiles will be segregated for shallow soil reuse. A supplemental soil sampling is warranted for segregation. Also, include other waste constituents to further characterize the soil stockpiles for soil reuse. Submit the supplemental soil sampling results by **December 15, 2015**.

If you have any questions, please contact me at (213) 576-6721 or paul.cho@waterboards.ca.gov.

Sincerely,

Paul Cho, P.G.
Site Cleanup Unit V
