Subject: **GROUNDWATER NON-DISCHARGE REPORT - QUARTER 2, 2019**  
**NPDES No. CAG994004; Compliance File No. CI-7585**  
Defense Fuel Support Point, Norwalk  
15306 Norwalk Boulevard  
Norwalk, California

On behalf of The Defense Logistics Agency Installation Management - Operations for Energy, DM-FE (DLA), The Source Group, Inc. (SGI) presents this Quarter 2, 2019 National Pollutant Discharge Elimination System (NPDES) *Groundwater Non-Discharge Report* for the Defense Fuel Support Point (DFSP) facility located at 15306 Norwalk Boulevard, Norwalk, California (Site).

### ***SUMMARY OF REMEDIATION PROGRESS***

Remediation systems at the Site include soil vapor extraction systems and a groundwater extraction and treatment system (GWETS). The treatment of extracted soil vapors and groundwater at the Site has been conducted to address historical impacts within the entire former tank farm, former water tank, former truck fueling, and pump house areas.

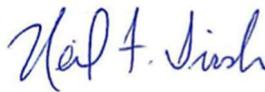

The GWETS consists of five vertical extraction wells (four 6-inch diameter wells and one 4-inch diameter well), three bag filter vessels, two MYCELX oil separator vessels, three granular activated carbon (GAC) vessels, and two ion exchange vessels. No groundwater extraction wells were in operation this period. The non-discharge of any treated groundwater during Quarter 2, 2019 is being reported to comply with Section IX, Part A.2 of the Monitoring and Reporting Program (MRP).

Should you have any questions or need additional information, please do not hesitate to contact the undersigned at (562) 597-1055.

Sincerely,

Michael Wood, P.E.  
Senior Engineer

Neil F. Irish, P.G. 5484  
Principal Geologist
