ADDENDUM TO SUPPLEMENTAL INVESTIGATION WORK PLAN FOR TRUCK FILL STATION, WATER TANK, AND NORTHEAST SETTLING POND AREAS, DEFENSE FUEL SUPPORT POINT NORWALK, 15306 NORWALK BOULEVARD, NORWALK, CALIFORNIA (SCP NO. 0286A, SITE NO. 16638)

Dear Mr. Olowu:

The California Regional Water Quality Control Board Los Angeles Region (Regional Board) have received and reviewed your April 1, 2010, *Addendum to Supplemental Investigation Workplan for Truck Fill Station, Water Tank, and Northeast Settling Pond Areas* (Workplan), prepared by Parsons. The Workplan proposes a technical approach and scope of work to assess the current limits of impacted soil and to propose further remedial action.

Based on our review of the submitted information, we concur with you on the proposed work and approaches. Since the purpose of the Workplan is to adequately delineate both lateral and vertical soil contamination, we recommend additional soil sampling points to complete the intended investigation if the proposed sampling points are not sufficient. We require a conceptual site model drawing for soil contamination at the areas within the Truck Fill Station, Water Tank, and Northeast Settling Pond with the verified data. Please complete and submit your assessment report and the conceptual site model drawing to us by **July 30, 2010**.

If you have any questions concerning this letter, please contact Mr. Paul Cho at (213) 576-6721.

Sincerely,

Kwang-il Lee, Ph.D., P.E.
DOD Program Manager
Chief, Site Cleanup IV Unit
