Subject: January 2011 Monthly Groundwater Monitoring Submittal
Project Name: Defense Fuel Support Point (DFSP) Norwalk

Item Description

- 1 Table 1 - Summary of Groundwater Elevations, January 2011 Monthly Monitoring Event
- 2 Table 2 - Summary of Groundwater Analytical Data, January 2011 Monthly Monitoring Event
- 3 Table 3 - Summary of Miscellaneous Compounds Detected in Groundwater Samples, January 2011 Monthly Monitoring Event
- 4 Table 4 - Summary of Total Fluids and Groundwater Extraction Pump Operation, January 2011 Monthly Monitoring Event

Remarks

On behalf of SFPP, L.P., an operating partnership of Kinder Morgan Energy Partners, L.P. (KMEP), CH2M HILL is transmitting the groundwater monitoring results for the January 2011 monthly monitoring event conducted at the DFSP Norwalk site. The January 2011 monthly monitoring event was conducted concurrently with the first quarter 2011 sentry monitoring event. Groundwater elevations and analytical data for wells monitored during this monthly monitoring event are summarized in Tables 1 through 3, and are briefly discussed below. The operation of SFPP's extraction wells at the end of January 2011 is summarized in Table 4.

- 1) During this monthly monitoring event, Blaine Tech Services, Inc. (Blaine Tech) sampled wells GMW-36, GMW-O-15, GMW-O-16, GMW-O-18, GMW-O-19, and PZ-5 located in the southeastern area. Blaine Tech gauged these well prior to sampling, except for well GMW-O-18 due to the presence of the extraction pump. Samples were collected from well GMW-O-18 through the wellhead sampling port.
- 2) The southeastern area extraction wells (GMW-36, GMW-O-15, and GMW-O-18) were down due to mechanical problems with the air compressor and conveyance line. Groundwater extraction from these wells resumed on February 10, 2011. Monthly groundwater monitoring in the southeastern area will continue and groundwater conditions will continue to be evaluated as additional groundwater monitoring and remediation system operation data are obtained.

- 3) Since December 2010, groundwater elevations increased in wells GMW-O-15, GMW-O-16 and GMW-O-19 (0.34 feet, 0.58 feet, and 0.33 feet, respectively), but decreased in well PZ-5 (1.42 feet). The variability of groundwater elevations between monitoring wells may be due to significant rainfall during the months of December 2010 and January 2011.
- 4) Wells GMW-36 and GMW-O-15 are used for TFE but also have been used to monitor groundwater conditions within the extent of free product in the southeastern area. Free product has historically been detected in both of these wells. During January 2011, free product was detected in well GMW-36 at a thickness of approximately 1.4 feet. Free product was not detected in well GMW-O-15. Reported concentrations of some volatile organic compounds (VOCs) (total xylenes), total petroleum hydrocarbons (TPH) quantified as gasoline (TPH-g), and TPH quantified as fuel product (TPH-fp) in well GMW-36 during January 2011 were higher than concentrations reported during December 2010. The concentrations of benzene, toluene, and ethylbenzene in well GMW-36 decreased in January 2011. Methyl tertiary butyl ether (MTBE) was not detected at the laboratory reporting limit of 100 micrograms per liter ($\mu\text{g}/\text{L}$). A decrease in TPH-g, TPH-fp, benzene, toluene, ethylbenzene, total xylenes, and MTBE was reported in well GMW-O-15, relative to the concentrations reported in December 2010. The tertiary butyl alcohol (TBA) concentration reported in well GMW-O-15 was approximately one order of magnitude higher than the concentration reported in December 2010. Fluctuation in concentrations of fuel constituents in wells with a historical presence of free product is expected depending on various factors such as water level fluctuation, groundwater extraction, and sampling methods.
- 5) Wells GMW-O-16, GMW-O-18, and GMW-O-19, and PZ-5 are located outside the extent of free product and used to monitor the extent of dissolved-phase fuel constituents in groundwater in the southeastern area. Similar to the previous monthly monitoring events, VOCs, TPH-g, and TPH-fp were not detected in well GMW-O-19 during January 2011. MTBE ($0.94 \mu\text{g}/\text{L}$) and benzene ($0.52 \mu\text{g}/\text{L}$) were detected in well GMW-O-16 during January 2011; TPH-g, TPH-fp, and remaining VOCs were non-detect. Reported concentrations of VOCs in well GMW-O-18 have generally decreased since October 2010 with the exception of TBA. TPH-g, TPH-fp, and TBA concentrations reported in well GMW-O-18 in January 2011 were higher than the concentrations reported in November 2010 (December 2010 data was unavailable for comparison). The TBA concentration in well GMW-O-18 increased from $21,000 \mu\text{g}/\text{L}$ in November 2010 to $29,000 \mu\text{g}/\text{L}$ in January 2011. The remaining VOCs in well GMW-O-18 were non-detect. TPH-g, MTBE, and TBA concentrations reporting in well PZ-5 in January 2011 were higher than the concentrations reported in December 2010. TPH-fp and benzene concentrations decreased relative to December 2010 concentrations. The remaining VOCs in well PZ-5 were non-detect. To address the dissolved-phase constituents in the southeastern area, TFE was expanded to include well GMW-O-18 in April 2010. In addition, an additional groundwater assessment near well GMW-O-18 was completed in late January 2011. The results of this investigation will be presented in a separate transmittal.
- 6) Two equipment blanks and one trip blank sample were collected during this sampling event. No VOCs, TPH-g, or TPH-fp were detected at or above laboratory reporting limits in the equipment or trip blank samples.

Please contact Dan Jablonski at 213.228.8271 if you have any questions.

Notes

--- = not detected or not applicable.

feet btoc = feet below top of casing.

feet msl = feet above mean sea level based on the National Geodetic Vertical Datum of 1929.

NC = not calculated.

NM = not measured since extraction pump was in operation.

Notes

1. The total xylenes result is the sum of m,p-xylenes and o-xylenes when detected.

2. Groundwater sample collected through a sampling port.

3. Free product was present.

4. Split groundwater sample analyzed by Calscience Environmental Laboratories, Inc. Results were evaluated to laboratory method detection limits.

Abbreviations

— = not analyzed or not applicable.

<5.0 = not detected at or above the laboratory reporting limit shown.

NS = not sampled due to presence of free product.

J = The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.

1,2-DCA = 1,2-dichloroethane.

DPE = di-isopropyl ether.

ETBE = ethyl tertiary butyl ether.

MTBE = methyl tertiary butyl ether.

TAME = tertiary amyl methyl ether.

TBA = tertiary butyl alcohol.

TPH-fp = total extractable petroleum hydrocarbons quantified using a site fuel product standard.

TPH-g = total purgeable petroleum hydrocarbons quantified using a gasoline standard (C4-C13).

TABLE 3

SUMMARY OF MISCELLANOUS COMPOUNDS DETECTED IN GROUNDWATER SAMPLES
JANUARY 2011 MONTHLY MONITORING EVENT
 Defense Fuel Support Point Norwalk
 Norwalk, California

Results reported in micrograms per liter (µg/L)

Sample ID	Date	1,2,4-Trimethylbenzene	1,3,5-Trimethylbenzene	4-Isopropyltoluene	Isopropylbenzene	Naphthalene	n-Butylbenzene	n-Propylbenzene	sec-Butylbenzene
GMW-36	01/12/11	12,000	6,800	250	210	4,000	370	650	290
GMW-O-15	01/12/11	500	130	<20	<20	170	<20	31	<20

TABLE 4
SUMMARY OF TOTAL FLUIDS AND GROUNDWATER EXTRACTION PUMP OPERATION
JANUARY 2011 MONTHLY MONITORING EVENT
 Defense Fuel Support Point Norwalk
 Norwalk, California

Remediation Area	Remediation Well ID	Pump Type	1/28/11 Pump Status (ON/OFF)	Comments
South-Central Area	GMW-9	TFE	OFF	
	GMW-22	TFE	ON	
	GMW-24	TFE	OFF	
	GMW-25	GWE	OFF	
	GWR-3	GWE	OFF	
	MW-SF-2	TFE	OFF	
	MW-SF-3	TFE	ON	
	MW-SF-6	TFE	OFF	
	MW-SF-11	TFE	OFF	
	MW-SF-12	TFE	OFF	
	MW-SF-13	TFE	ON	
	MW-SF-14	TFE	ON	
	MW-SF-15	TFE	ON	
	MW-SF-16	TFE	ON	
	MW-O-1	TFE	OFF	
	MW-O-2	TFE	OFF	
	GMW-O-11	TFE	OFF	
	GMW-O-20	TFE	OFF	
	GMW-O-21	TFE	ON	
	GMW-O-23	TFE	OFF	
Southeastern Area	GMW-O-15	TFE	OFF	Down due to mechanical issues with the conveyance line.
	GMW-O-18	TFE	OFF	
	GMW-36	TFE	OFF	

Notes

Data reported based on information provided by SFPP, L.P.

Abbreviations

GWE = groundwater extraction.
 TFE = total fluids extraction.
