On December 2, 2014, the California Regional Water Quality Control Board (Regional Board) received the technical document titled *Workplan for Well Abandonment* (Workplan), prepared by The Source Group, Inc., on your behalf, for the above referenced site (Site). The Workplan proposes to remove a total of 42 wells as they are located within the soil excavation footprints throughout the Site, including 17 groundwater monitoring wells, 14 vapor extraction wells, 9 inactive sparging wells, 1 groundwater extraction well, and 1 groundwater gauge well.

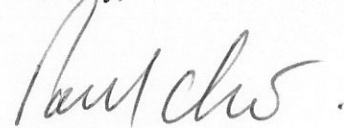

The following wells are proposed to be replaced after a completion of soil excavation and fill the treated soil using onsite biotreatment:

The Workplan proposes to submit a well replacement workplan by October 30, 2015. Based on our review, we approve the proposed well abandonment work. The well replacement workplan and the well abandonment report are due to the Regional Board on **October 30, 2015**.
