**Subject:** December 2010 Monthly Groundwater Monitoring Submittal  
**Project Name:** Defense Fuel Support Point (DFSP) Norwalk

**Item Description**

- 1 Table 1 - Summary of Groundwater Elevations, December 2010 Monthly Monitoring Event
- 2 Table 2 - Summary of Groundwater Analytical Data, December 2010 Monthly Monitoring Event
- 3 Table 3 - Summary of Miscellaneous Compounds Detected in Groundwater Samples, December 2010 Monthly Monitoring Event
- 4 Table 4 - Summary of Total Fluids and Groundwater Extraction Pump Operation, December 2010 Monthly Monitoring Event

**Remarks**

On behalf of SFPP, L.P., an operating partnership of Kinder Morgan Energy Partners, L.P. (KMEP), CH2M HILL is transmitting the groundwater monitoring results for the December 2010 monthly monitoring event conducted at the DFSP Norwalk site. Groundwater elevations and analytical data for wells monitored during this monthly monitoring event are summarized in Tables 1 through 3, and are briefly discussed below. The operation of SFPP's extraction wells during December 2010 is summarized in Table 4.

- 1) During this monthly monitoring event, Blaine Tech Services, Inc. (Blaine Tech) gauged and sampled wells GMW-36, GMW-O-15, GMW-O-16, GMW-O-19, and PZ-5 located in the southeastern area. Well GMW-O-18 was not gauged or sampled due to mechanical problems with the total fluids extraction (TFE) pump at the time of sampling.
- 2) Since November 2010, groundwater elevations decreased in wells GMW-O-16 and GMW-O-19 (0.42 feet and 0.03 feet, respectively), but increased in well PZ-5 (1.34 feet). The fluctuations in groundwater elevations during December 2010 are likely due to significant rainfall just prior to gauging and sampling the southeastern area wells.
- 3) Wells GMW-36 and GMW-O-15 are used for TFE but also have been used to monitor groundwater conditions within the extent of free product in the southeastern area. Free product has historically been detected in both of these wells. During December 2010, free

product was detected in well GMW-36 at a thickness of approximately 1.5 feet. Free product was not detected in well GMW-O-15. Reported concentrations of some volatile organic compounds (VOCs) (benzene, toluene, ethylbenzene, total xylenes), total petroleum hydrocarbons (TPH) quantified as gasoline (TPH-g), and TPH quantified as fuel product (TPH-fp) in well GMW-36 during December 2010 were higher than concentrations reported during November 2010. The concentration of methyl tertiary butyl alcohol (MTBE) decreased from 51 µg/L in November 2010 to 28 µg/L in December 2010. An increase in TPH-g, TPH-fp, benzene, toluene, ethylbenzene, and total xylenes was reported in well GMW-O-15, relative to the concentrations reported in October 2010 (November 2010 data was unavailable for comparison). MTBE and tertiary butyl alcohol (TBA) concentrations reported in well GMW-O-15 were lower than the concentrations reported in October 2010. Fluctuation in concentrations of fuel constituents in wells with a historical presence of free product is expected depending on various factors such as water level fluctuation, groundwater extraction, and sampling methods.

- 4) Wells GMW-O-16, GMW-O-18, and GMW-O-19, and PZ-5 are located outside the extent of free product and used to monitor the extent of dissolved-phase fuel constituents in groundwater in the southeastern area. Similar to the previous monthly monitoring events, VOCs, TPH-g, and TPH-fp were not detected in well GMW-O-19 during December 2010. MTBE was detected in well GMW-O-16 during December 2010; TPH-g, TPH-fp, and remaining VOCs were non-detect. Reported concentrations of TPH-fp and TBA in well PZ-5 increased relative to November 2010 concentrations. TPH-g, benzene, and MTBE decreased or remained the same in December 2010. Remaining VOCs in well PZ-5 were not detected above the laboratory reporting limit. To address the dissolved-phase constituents in the southeastern area, TFE was expanded to include well GMW-O-18 in April 2010. In addition, an additional groundwater assessment near well GMW-O-18 was completed in late January 2011. The results of this investigation will be presented in a separate transmittal.
- 5) The southeastern area extraction wells (GMW-36, GMW-O-15, and GMW-O-18) were down due to mechanical problems with the air compressor and conveyance line. Groundwater extraction from these wells resumed on February 10, 2011. Monthly groundwater monitoring in the southeastern area will continue and groundwater conditions will continue to be evaluated as additional groundwater monitoring and remediation system operation data are obtained.
- 6) One equipment blank and one trip blank sample were collected during this sampling event. No VOCs, TPH-g, or TPH-fp were detected at or above laboratory reporting limits in the equipment or trip blank samples.

Please contact Dan Jablonski at 213.228.8271 if you have any questions.

**Notes**

--- = not detected or not applicable.

feet btoc = feet below top of casing.

feet msl = feet above mean sea level based on the National Geodetic Vertical Datum of 1929.

NC = not calculated.

NM = not measured since extraction pump was in operation.

**Notes**

- The total xylenes result is the sum of m,p-xylenes and o-xylenes when detected.
- Groundwater sample collected through a sampling port.
- Free product was present.
- Split groundwater sample analyzed by Calscience Environmental Laboratories, Inc. Results were evaluated to laboratory method detection limits.

**Abbreviations**

- = not analyzed or not applicable.
- <5.0 = not detected at or above the laboratory reporting limit shown.
- NS = well not sampled due to presence of free product.
- J = The analyte was positively identified, the associated numerical value is the approximate concentration of the analyte in the sample.
- 1,2-DCA = 1,2-dichloroethane.
- DIPE = di-isopropyl ether.
- ETBE = ethyl tertiary butyl ether.
- MTBE = methyl tertiary butyl ether.
- TAME = tertiary amyl methyl ether.
- TBA = tertiary butyl alcohol.
- TPH-tp = total extractable petroleum hydrocarbons quantified using a site fuel product standard.
- TPH-g = total purgeable petroleum hydrocarbons quantified using a gasoline standard (C4-C13).

**TABLE 3**

**SUMMARY OF MISCELLANEOUS COMPOUNDS DETECTED IN GROUNDWATER SAMPLES  
DECEMBER 2010 MONTHLY MONITORING EVENT**

Defense Fuel Support Point Norwalk  
Norwalk, California

Results reported in micrograms per liter ( $\mu\text{g/L}$ )

<b>Sample ID</b>	<b>Date</b>	<b>1,2,4-Trimethylbenzene</b>	<b>1,3,5-Trimethylbenzene</b>	<b>Naphthalene</b>	<b>n-Propylbenzene</b>
GMW-36	12/22/10	1,300	520	520	98
GMW-O-15	12/22/10	1,100	300	300	87

	GMW-O-20	TFE	OFF	
GMW-O-21	TFE	ON		
GMW-O-23	TFE	OFF		
Southeastern Area	GMW-O-15	TFE	OFF	
	GMW-O-18	TFE	ON	
	GMW-36	TFE	OFF	

**Notes**

Data reported based on information provided by SFPP, L.P.

**Abbreviations**

GWE = groundwater extraction.

TFE = total fluids extraction.
