CERTIFICATION STATEMENT

I declare under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted.

Based upon my inquiry of the person or persons who manage the system or those directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment for knowing violations. [CWC Sections 13263, 13267, and 13268]

Executed on the 15 day of October at Signal Hill, California

Paul Parmentier, P.G.
Principal Geologist
The Source Group, Inc.

1.0 INTRODUCTION

On behalf of the Defense Logistics Agency - Energy (DLA Energy), The Source Group, Inc. (SGI) is submitting this *Third Quarter 2015 Waste Discharge Progress Report* at the Defense Fuel Support Point (DFSP) Norwalk site (Figure 1) as required by the California Regional Water Quality Control Board (RWQCB) Order Number 90-148, CI-10118.

This report, in accordance with the *Onsite Soil Management Plan* (Parsons, 2012), includes details on the impacted soil excavation, disposal, and onsite soil reuse activities.

The RWQCB approved the Waste Discharge Requirements Permit (WDR) on February 6, 2015.

In February 2015, SGI submitted the technical document titled *Field Sampling and Analysis Plan* (Plan), dated February 11, 2015 to the Regional Water Quality Control Board (RWQCB), revised on April 10, 2015 and on June 15, 2015 (SGI, 2015a).

On July 9, 2015, SGI submitted to RWQCB a document to propose revised cleanup goals, which were approved by RWQCB on July 16, 2015.

During this quarter, SGI has submitted reports and work plans for phases of soil remediation and soil reuse: *Phase 2 Stockpiles and Excavations Confirmation Sampling Report*; July 30, approved on August 13, 2015, and a similar Phase 3 report (SGI; September 3, 2015) approved on September 21, 2015.

In addition to the Regional Board requirements, the soil treatment operations are also conducted in compliance with South Coast Air Quality Management District site-specific permit number 566483 and 568793.

2.0 LAND TREATMENT

Excavation continued during the third quarter 2015. A summary of the treatment soil piles sampling, volumes, management and timeline is presented on Table 1. Figure 2A to 2C illustrate the location of the excavations, stockpiles, and soil treatment areas during the third quarter of 2015. In addition to sampling of excavations and stockpiles, sampling also included baseline sampling of the surface soil in areas scheduled for treatment. The RWQCB was notified in advance of sampling events. As further described in the next section, Table 2 presents the results of progress sampling. Individual reports on excavation sampling, stockpile sampling, and baseline sampling were prepared during this reporting period. Tables 1 and 2 will be updated in future reports to maintain a full record of all site excavations, sampling and back filling.

Photographs included in Appendix A document operations at the site, and photographs are also included in the Phase reports submitted to RWQCB. As summarized in Table 1, as of the end of the third quarter 2015, approximately 30,800 cubic yards of soil have been excavated, placed into treatment piles, and partially reused. Soil treatment, disposal, and confirmation of clean soil will continue to be documented in future reports.

2.1 Cell Construction

2.1.1 Surface Soil Baseline Sampling

Prior to construction of each soil treatment pile, the soil beneath the future treatment stockpile was sampled—as shown in Table 1—and analyzed to determine existing levels of hydrocarbons present. After soil treatment has been completed, this soil will be resampled and analyzed to evaluate if this native soil has been contaminated with hydrocarbons from the soil treatment operations.

2.1.2 HDPE Liners

To further protect the soil beneath the treatment piles, 30 mil high-density polyethylene (HDPE) liners were placed six inches below the ground surface beneath the treatment piles.

2.1.3 Cell Construction

As of early October 2015, 30 soil treatment cells have been constructed on site. These consist of six treatment cells in the Powerine Basin, seven treatment piles in each of the 80004 and 80006 basins, five cells in the 80002 basin, and five treatment cells in the 80013 basin.

2.1.4 Cells: Plastic Cover

Once the treated soil has been placed in each treatment pile, the pile is covered with two layers of 6mm heavy duty plastic sheets and secured with sand bags.

2.1.5 Storm Water Runoff Control

The treatment cells are located within bermed areas. Where bermed areas are breached to allow for construction equipment access, a slope is maintained to ensure control of runoff. On September 15, 2015, the first significant rain event occurred. The flow of storm water in the soil treatment areas was noted, and on-site excavation equipment was mobilized to construct drains between or around soil piles, as well as storm water collection areas. A vacuum truck was deployed on September 16, 2015, and ponding rainwater was extracted and added to the on-site treatment system. Paul Cho of RWQCB inspected these operations on September 16, 2015, and the photograph also documents this water management. All site-watering activities (conducted to control dust) are controlled to prevent runoff. Approximately weekly, a street sweeper service is also contracted to reduce off-site dragging of soil.

2.2 Soil Treatment

Contaminated soil is treated via processing through an Earth Cleaning Machine provided by Bulldog Green Remediation, Inc. (BGR). As soil is fed into the machine, a mixture of non-toxic surfactant and non-pathogenic microbes is mixed throughout the soil, and the soil is then discharged for placement into piles within the treatment cells, as shown in the attached photos. Soil moisture is monitored in several ways, including monthly sampling and laboratory testing, tensiometer probe testing, and infrared imaging. Additional water and nutrients did not need to be added to the soil piles during the treatment period. DLA reported to RWQCB on September 5, 2015 a change in suppliers for materials used for soil treatment at the site, and on October 2, 2015, RWQCB concurred that the soil treatment modification did not constitute a material change to the WDR operations.

2.2.1 Soil Moisture Monitoring

Soil moisture was monitored by tensiometer reading, visual inspection of moisture condensation on the inside surface of the pile cover, and confirmed by laboratory analyses (Table 2).

2.2.2 Additional Water and Nutrients Addition

Based on field and laboratory testing results, no water and no nutrients were added to the treatment soil piles during the third quarter 2015.

2.2.3 Soil Treatment Volume

As of September 30, 2015, approximately 30,800 cubic yards of soil have been treated with 14,098 cubic yards approved for reuse by RWQCB. Volumes for each treatment stockpile are also reported to RWQCB for each phase of soil reuse. Table 1 lists the excavated treatment soil pile volumes.

2.3 Progress Sampling

Progress sampling events took place monthly for each soil pile under treatment in July, August, and September, typically during the last week of each month. Table 2 lists the results for moisture, microbiology plate count, and TPH. The laboratory reports are included in Appendix B and C.

Soil piles are also inspected daily during site operations. Inspection logs are included in Appendix D.

2.4 Acceptance Sampling and Post-Treatment Sampling

Acceptance sampling results were submitted to RWQCB in a Phase 2 and Phase 3 report, and RWQCB approved soil reuse based on segregation of each set of treated soil stockpile (6,431 and 7,667 cubic yards, respectively).

2.5 Exceptions to the Order

There were no exceptions to the Regional Board Order during this reporting period. The site's land treatment operations still fall within the order's guidelines of under 100,000 cubic yards treated and less than 365 days.

Notes: Detections are shown in **bold**.
<10 = not detected at or above the indicated laboratory reporting limit.
% = percent.
CFU/gm = colony forming units per gram.
mg/kg = milligrams per kilograms.
TPH = total petroleum hydrocarbons.
GRO = gasoline-range organics.
C13-C22 = carbon chains ranging from C13 through C22.
% Moisture by EPA Method AOAC 950.46.
Pseudomonas Spp. Bacteria Count By EPA Method SM9215C Modified.
Hydrocarbon Chain Identification analyzed by EPA Method 8015B(M).
GRO analyzed by EPA Method 8260B/5035.
RWQCB = Regional Water Quality Control Board.
EPA = Environmental Protection Agency.

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007
A5331453 / 5H21005**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 08/21/15 12:44 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007
A5331456 / 5H28001**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 08/28/15 09:36 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile
Operations Manager

Special Notes

- [1] = ** : Exceeds upper control limit
- [2] = *** : Exceeds RPD limit
- [3] = **QM-07** : The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
- [4] = **S-GC** : Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).

Gasoline Range Organics (GRO) concentration represents the C4-C12 carbon range.

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007
A5331473 / 5I15010**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 09/15/15 10:54 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007
A5331482 / 5I23009**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 09/23/15 09:04 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile
Operations Manager
