**SUBJECT: WORKPLAN FOR AN INVESTIGATION OF FREE PRODUCT IN
GROUNDWATER MONITORING WELL GMW-62**

**SITE/CASE: DEFENSE FUEL SUPPORT POINT NORWALK, 15306 NORWALK
BOULEVARD, NORWALK, CALIFORNIA (SCP NO. 0286A, SITE ID NO. 16638)**

Dear Mr. Bole:

On February 14, 2014, the California Regional Water Quality Control Board (Regional Board) received the technical document titled *Second Semiannual 2013 Groundwater Monitoring Report* (Report) prepared by Parsons on your behalf for the above referenced site. The Report provides results of groundwater monitoring activities conducted at the site during the second half of 2013.

Groundwater monitoring well GMW-62, which was installed in July 2007, is located near the northeastern site boundary. Free product was first encountered in October 2010 and has been reported as shown below:

Date	Apparent Product Thickness (feet)
01/10/2011	0.3
04/07/2011	1.68
07/07/2011	0.11
10/06/2011	0.94
01/09/2012	0.05
04/12/2012	0.1
01/11/2013	-
04/08/2013	1.78
10/02/2013	1.33

The Report states that a free product recovery is conducted using vacuum pump at GMW-62 when the free product thickness is measured between 0.5 feet to 1 foot. Since the free product was discovered three years after the well was installed, it is necessary to further assess the presence of free product in the well to determine potential new releases or offsite migration of subsurface light non-aqueous phase liquid (LNAPL) mass. Submit a workplan to investigate for further understanding of the presence of the free product in GMW-62 to the Regional Board by **May 15, 2014**.

Mr. Everett Bole
Defense Logistics Agency Energy
