

Los Angeles Regional Water Quality Control Board

March 16, 2015

Mr. Everett Bole
DLA Installation Support - Energy
8725 John J. Klingman Road
Fort Belvoir, VA 22060

**SUBJECT: APPROVAL OF REVISED WORKPLAN FOR FURTHER EVALUATION OF
GMW-62 LIGHT NON-AQUEOUS PHASE LIQUID**

**SITE/CASE: DEFENSE FUEL SUPPORT POINT NORWALK, 15306 NORWALK BOULEVARD,
NORWALK, CALIFORNIA (SCP NO. 0286A, SITE ID NO. 16638)**

Dear Mr. Bole:

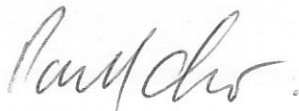

On December 15, 2014, the California Regional Water Quality Control Board (Regional Board) received the technical document titled *Revised Workplan for Further Evaluation of GMW-62 Light Non-Aqueous Phase Liquid (LNAPL)* (Workplan), prepared by The Source Group, Inc., on your behalf, for the above referenced site. The Workplan proposes to evaluate whether a new release has occurred by installing three groundwater monitoring wells in Holifield Park for further evaluation of LNAPL occurrence in GMW-62.

Based on our review, we approve the Workplan with the following addition:

- The Workplan proposes that down-well absorbent material, passive skimmers, hand-bailing, or vacuum truck will be selected for LNAPL mass removal depending on free product thickness measured from the proposed groundwater monitoring wells. The Regional Board staff has a concern that a remedy selection for LNAPL mass removal is solely based on free product thickness. Therefore, measure LNAPL transmissivity according to ASTM E2856-11 for GMW-62 and nearby wells with free product, including the proposed groundwater monitoring wells, and provide data to the Regional Board for further review of the proposed LNAPL mass removal technologies.

Submit a well installation report with assessment and LNAPL transmissivity data to the Regional Board by **June 30, 2015**. If you have any questions, please contact Mr. Paul Cho at (213) 576-6721 (paul.cho@waterboards.ca.gov).

Sincerely,

Paul Cho, P.G.
Engineering Geologist
Site Cleanup Unit III
