## 1.0 INTRODUCTION

This report documents the handling and confirmation sampling of stockpiled soil and excavations associated with the soil excavation operations at the Defense Fuel Support Point Norwalk site located at 15306 Norwalk Boulevard, in Norwalk, California (Site).

This *Phase 2 Stockpiles and Excavations Confirmation Sampling Report and Request for Soil Reuse* (Confirmation Report) was prepared by The Source Group, Inc. (SGI), on behalf of the Defense Logistics Agency - Energy (DLA Energy). This report is one of several completion reports resulting from site-wide excavation, soil segregation, and soil treatment conducted at the Site.

The remediation of soil and groundwater and the removal of light non-aqueous phase liquids (LNAPL) has been on-going since 1995 and has resulted in the removal of the majority of the LNAPL from the shallow aquifer and the removal and destruction of thousands of pounds of hydrocarbons present in soil and groundwater using extractive and in situ treatment methods. The primary sources of contamination (tanks and pipelines) associated with former DLA Energy operations have also been removed.

To implement additional source removal, DLA Energy proposed excavation of soil with on-site treatment. The soil removal and proposed confirmation sampling was proposed in SGI's *Soil Remediation Action Plan* (SGI, 2014), conditionally approved on January 7, 2015, by the Los Angeles Regional Water Quality Control Board (RWQCB). Soil excavation is also being conducted under South Coast Air Quality Management District (SCAQMD) site-specific soil excavation and treatment permits No. 566483 and 568793.

On July 9, 2015, SGI submitted to RWQCB a *Proposed Addendum to the Soil Cleanup Goals* (SGI, 2015c) to clarify the hydrocarbon ranges and include longer-chain hydrocarbons (with carbon chains >C25), and the RWQCB indicated that these updated cleanup goals are acceptable for the Site.

The soil treatment, confirmation sampling and backfilling procedures for the site were presented in SGI's June 15, 2015, *Revised Field Sampling and Analysis Plan and Sampling Strategy* (SGI, 2015a) and the June 15, 2015, *Workplan for VOC Analyses Results Validation* (SGI, 2015b).

DLA Energy is submitting stockpile- and excavation-specific reports of confirmation sampling results to request RWQCB's approval to reuse the soil to backfill the excavations. This report presents the details and results for stockpiled soil segregated as clean soil during excavation (clean stockpiles CS-11 and CS-13) and for treated soil stockpiles (soil treatment stockpiles in Powerine Basin). This report also presents the result of confirmation samples for three shallow excavations (#1, #2, and #8) in the central part of the Site. Figures 1 and 2 present the locations of the clean stockpiles and treated soil piles (Figure 1) and of the completed excavations (Figure 2).

After RWQCB approves the reuse of soil, DLA Energy will submit to RWQCB reports on the backfilling of excavations to document where the reuse soil was used at the site. When all site

excavation has been completed, this Confirmation Report will be incorporated by reference within a site-wide soil remediation completion report.

## **2.0 STOCKPILE C-CS-11-EX19-SP01 AND C-CS-13-EX16-SP01 CONFIRMATION SAMPLING AND RESULTS**

The excavation of areas of hydrocarbon-contaminated soil at the Site resulted in the removal of overburden soil that was confirmed in the field by Photoionization Detector (PID) screening and visual observations to be non-contaminated. That soil was stockpiled at the Site and sampled pending approval for its reuse. The location, origin and confirmation sampling of these stockpiles are further presented in the following sections.

### **2.1 Stockpile C-CS-11-EX19-SP01 and C-CS-13-EX16-SP01 Origin and Location**

Figure 1 presents the location of stockpiles C-CS-11-EX19-SP01 and C-CS-13-EX16-SP01. The origin and estimated volume of the stockpiled soil are documented as follows.

#### **2.1.1 Stockpile Number C-CS-11-EX19-SP01**

This stockpile originated as soil segregated as clean soil from Excavation #19 in the vicinity of former Tank 55004. This stockpile is located north of former Tank 55004 (Figure 1).

#### **2.1.2 Stockpile Number C-CS-13-EX16-SP01**

This stockpile originated as soil segregated as clean soil from Excavation #16 in the vicinity of former Tank 80008. This stockpile is located north of former Tank 80008 (Figure 1).

### **2.2 Stockpile Volume, Sampling, and Findings**

Tables 1 and 2 list the results of total petroleum hydrocarbon (TPH) and volatile organic compound (VOC) analyses of the stockpile confirmation samples. The laboratory reports are provided in Appendix A-1.

#### **2.2.1 Stockpile Number C-CS-11-EX19-SP01**

The volume of this stockpile was estimated at 1,850 cubic yards. In accordance with the sampling protocol for soil reuse as described in the *June 15 Revised Field Sampling and Analysis Plan and Strategy, Table 2, Sampling*, a total of 31 soil samples were collected for characterization of the soil pile. The analytical results were compared to the strictest cleanup goal for soil to be used at depths greater than 5 feet below grade.

All TPH and VOC analyses results were below the strictest cleanup goals.

The range of TPH values were as follows:

Gasoline-Range Organics (GRO; deep cleanup goal: 100 milligrams per kilogram [mg/kg]): GRO were not detected (<0.50 mg/kg) in any of the confirmation samples,

TPH C6-C12 (deep cleanup goal: 100 mg/kg): All non-detect (<1.0 mg/kg),

TPH C13-C22 (deep cleanup goal: 100 mg/kg): non-detect (<1.0 mg/kg) to 26 mg/kg,

TPH C23-C44 (deep cleanup goal: 1,000 mg/kg): non-detect (<1.0 mg/kg) to 176 mg/kg.

The results of VOC analyses indicate that the samples from Stockpile C-CS-11-EX19-SP01 were non-detect for all VOCs (see Table 2 for laboratory reporting limits).

### **2.2.2 Stockpile Number C-CS-13-EX16-SP01**

The volume of this stockpile was estimated at 1,130 cubic yards. In accordance with the sampling protocol for soil reuse as described in the *June 15 Revised Field Sampling and Analysis Plan and Strategy, Table 2, Sampling*, a total of 29 soil samples were collected for characterization of the soil pile. The analytical results were compared to the strictest cleanup goal for soil to be reused at depths greater than 5 feet below grade.

All TPH and VOC analyses results were below the strictest cleanup goals.

The range of TPH values were as follows:

Gasoline-Range Organics (GRO; cleanup goal: 100 mg/kg): GRO were not detected (<0.50 mg/kg) in any of the confirmation samples,

TPH C6-C12 (deep cleanup goal: 100 mg/kg): reported in two of the 29 analyzed samples (1.5 and 31 mg/kg),

TPH C13-C22 (deep cleanup goal: 100 mg/kg): non-detect (<1.0 mg/kg) to 46 mg/kg,

TPH C23-C44 (deep cleanup goal: 1,000 mg/kg): non-detect (<1.0 mg/kg) to 573 mg/kg.

The results of VOC analyses indicate that the samples from Stockpile No. C-CS-13-EX16-SP01 were non-detect for all VOCs (see Table 2 for laboratory reporting limits).

### **2.3 Summary of Stockpile Confirmation Sampling**

The sampling and analyses of confirmation soil samples from the C-CS-11-EX19-SP01 and C-CS-13-EX16-SP01 stockpiles indicate concentrations of TPH and VOCs below the strictest approved cleanup goals for the Site. The soil is therefore suitable for reuse at any depth at the Site.

### **2.4 Site-Wide Summary of Clean Soil Stockpiles**

Appendix B contains a tabulated site-wide summary (Table B-1) of clean soil stockpiles including volumes and confirmation sampling status.

### 3.0 TREATED SOIL CONFIRMATION SAMPLING AND RESULTS

This section presents the sampling and analyses results for two soil treatment stockpiles located in the former Powerine Basin in the northern part of the Site. These soil treatment piles were the first bioremediation treatment piles at the site. After soil treatment by addition of specialty bacteria, nutrients and moisture, the treated soil was placed in stockpiles and monitored. Once the monitoring data suggest treatment is complete, confirmation samples are collected from the stockpiles. This report presents results of confirmation samples.

The sampling of the treated soil followed the June 15 *Revised Field Sampling and Analysis Plan and Strategy* (SGI, 2015a).

#### 3.1 Treated Stockpiles Confirmation Sampling

The sampling of the Powerine soil treatment stockpiles (Powerine-A-01 to Powerine-D-01) was conducted on July 15, 16, and 20, 2015, using Terracore samplers with sodium bisulfate and methanol preservatives following USEPA Method 5035.

Some of the bisulfate-preserved samples also were reported to contain acetone concentrations that are attributed to the reaction of the bisulfate with organics in the soil, and this apparent presence of acetone is not considered a sign of site contamination by acetone. This minor issue was previously reported during the data validation sampling, as reported by SGI (SGI, 2015e).

##### 3.1.1 Treated Soil Stockpile Powerine-D-01

Thirty five soil samples were collected from Stockpile Powerine-D-01 as illustrated in Figure 5A. The results are listed on Table 3 (TPH) and 4 (VOCs), and the laboratory reports are included in Appendix A-2. The results indicate that 31 out of 35 samples contained TPH concentrations below cleanup goals for deep soil and four samples contained TPH concentrations below cleanup goals for shallow soil.

In addition to TPH exceedances, the results of VOC analyses also indicate that the first sample collected (T00001), from the northern end of the pile, also contained concentrations of MtBE, TBA and MEK above cleanup goals. This VOC presence is uncertain, as the fuels handled as part of DLA operations at the Site did not contain these compounds, and could also be the results of sampling or analysis procedures. Conservatively, this soil will be assumed to be contaminated and will be segregated for re-treatment.

##### 3.1.2 Treated Soil Stockpile Powerine-C-01

Thirty-five soil samples were collected from Stockpile Powerine-C-01, as illustrated in Figure 5B. The results are listed on Tables 3 and 4, and the laboratory report is included in Appendix A-2. The results of analyses indicate residual hydrocarbon concentrations higher than reported for the Stockpile Powerine-D-01 soil treatment pile. The presence of residual hydrocarbons in Stockpile Powerine-C-01 can likely be attributed to the presence of oily material observed in the material

during soil removal in Excavation #3. Soil from that excavation that appeared visibly impacted was segregated and hauled off-site, with 790 tons hauled off to the Waste Management Simi Valley facility.

The results indicate that among 35 samples, 9 samples contained hydrocarbons below deep cleanup goals, 22 samples contained hydrocarbon levels acceptable for shallow backfilling and 4 samples contained hydrocarbon concentrations above all cleanup goals.

### **3.1.3 Treated Stockpile Powerine-B-01**

Thirty-five soil samples were collected from Stockpile Powerine-B-01, as illustrated in Figure 5C. The results are listed on Tables 3 and 4, and the laboratory report is included in Appendix A-2.

The results indicate that among 35 samples, 4 samples contained hydrocarbon levels acceptable for shallow backfilling, with the remaining 31 samples containing hydrocarbon concentrations acceptable for backfilling at any depth.

### **3.1.4 Treated Stockpile Powerine-A-01**

Thirty-five soil samples were collected from Stockpile Powerine-A-01, as illustrated in Figure 5D. The results are listed on Tables 3 and 4, and the laboratory report is included in Appendix A-2.

The results indicate that among 35 samples, 1 sample contained hydrocarbon levels acceptable for shallow backfilling, with the remaining 34 samples containing hydrocarbon concentrations acceptable for backfilling at any depth.

## **3.2 SUMMARY OF TREATED STOCKPILES CONFIRMATION SAMPLING**

Four sections of treated Stockpile Powerine-D-01 will be segregated for reuse as shallow backfill only, and the northern section will be removed for re-treatment. One section of treated Stockpile Powerine-A-01 and four sections of treated Stockpile Powerine B-01 will be segregated for reuse as shallow backfill.

Four sections of the treated Stockpile Powerine-C-01 will be segregated and taken to be re-treated; the remaining Stockpile Powerine-C-01 consists of 30% (9 samples out of 31 samples) soil acceptable for deep backfilling and 70% acceptable for shallow backfilling. Conservatively, it is proposed that, after extraction of four sections of higher hydrocarbon concentration, all residual soil from Stockpile Powerine-C-01 be reused for shallow soil backfilling.

## **3.3 SITE-WIDE SUMMARY OF TREATED SOIL STOCKPILES**

Appendix B contains tabulated site-wide summary (Table B-2) of treated soil stockpiles including volumes and confirmation sampling status.

## **4.0 EXCAVATIONS #1, #2, AND #8 CONFIRMATION SAMPLING AND RESULTS**

This section presents confirmation sampling data for Excavations #1, #2, and #8.

### **4.1 Excavation Areas**

Figure 2 presents a site map that provides the locations of Excavations #1, #2, and #8. This completion report provides excavation-specific information. Appendix C includes survey documentation for the excavations.

### **4.2 Description of Excavations**

Soil removal in Excavation #1 was conducted in April 2015. Excavation #1 was approximately 49 feet long east-west and 72 feet north-south, with a depth of 5 feet. Total soil volume is estimated to be 556 cubic yards, with 541 cubic yards segregated in the field as clean soil and 15 cubic yards segregated as contaminated based on field screening (visual and PID readings). The removal of soil in Excavation #1 targeted hydrocarbons identified in previous soil boring DPT-120 and DTP-120-52, which contained TPH-D above cleanup goals at a depth of 0.5 feet below grade. Five deep samples collected at location DPT-120 from 5 feet to 23.5 feet below grade indicated low to non-detected TPH-D concentrations.

Soil removal in Excavation #2 was conducted from March 31, 2015 to April 1, 2015. Excavation #2 was approximately 84 feet long east-west and 63 feet long north-south, with a depth of 3 feet. The original excavation had a depth of 5 feet, but the top 18-24 inches of soil surrounding the excavation was removed due to observed hydrocarbons. An estimated total of 1,095 cubic yards were excavated, with 23 cubic yards segregated in the field as clean soil and 1,072 cubic yards segregated as contaminated based on field screening. Excavation #2 targeted hydrocarbon identified in previous boring DPT-66 which reported TPH-D concentrations above cleanup goals at a depth of 0.5 feet. Five deeper samples from 5 feet to 26.5 feet below grade at location DPT-66 contained non-detectable TPH-D concentrations.

Soil removal in Excavation #8 was conducted from April 7, 2015 to April 10, 2015. Excavation #8 was approximately 97 feet long east-west and 78 feet long north-south. A total of 1,303 cubic yards were excavated, with 980 cubic yards segregated in the field as clean soil and 323 cubic yards segregated as contaminated based on field screening. Excavation #8 targeted hydrocarbons identified in previous reports at the southern edge of former tank 80013.

### **4.3 Excavations #1, #2, and #8 Confirmation Sampling Results**

Excavation confirmation samples are collected in accordance with the Revised Field Sampling and Analysis Plan and Sampling Strategy (SGI, 2015a).

#### **4.3.1 Excavation #1 Confirmation Sampling (Figure 6)**

- 36 sidewall samples were collected at depths of 1, 3, and 5 feet;
- 6 floor samples were collected from the floor of the excavation at a depth of 5 feet.

All samples indicated TPH and VOC concentrations below cleanup goals.

#### **4.3.2 Excavation #2 Confirmation Sampling (Figure 7)**

- 28 initial sidewall samples were collected at depths of 1 and 3 feet. Two samples along the east edge of the northern face of the excavation (locations N41-1 and NA-3) were found to contain hydrocarbons in excess of cleanup goals and therefore, additional soil was excavated and the locations were resampled. Additional confirmation samples (N4-1A and N4-3A) were found to contain hydrocarbons at concentrations below cleanup goal.
- Eight initial floor samples were collected at depths of 3 feet below grade. One sample (F8-3) was found to contain hydrocarbons above cleanup goals, and the excavations in the area if F-8 was extended to 5 feet, where sample F8-5 was collected and found to contain hydrocarbons below cleanup goals.
- On July 21, 2015 at the request of RWQCB, an additional sample (F8-10) was collected and found to contain hydrocarbons concentrations below cleanup goals.

#### **4.3.3 Excavation #8 Confirmation Sampling (Figure 8)**

- 51 sidewall samples were collected at depths of 1, 3, and 5 feet;
- Eight floor samples were collected at a depth of 5 feet below grade.

All confirmation samples were found to contain hydrocarbon at concentrations below cleanup goals.

#### **4.4 Confirmation Sampling Results**

Figures 6, 7, and 8 are “box” completion diagrams of the final completed excavations prior to backfilling with the location of confirmation samples. Note that the actual shape of each final excavation is not a symmetrical box. The purpose of the diagram is to facilitate the visualization and interpretation of the final sidewall and bottom characterization of each excavation area prior to backfill. Soil samples were analyzed for total petroleum hydrocarbons (TPH - carbon chain characterization) using EPA Method 8015M and for volatile organic compounds (VOCs), including benzene, toluene, ethyl benzene, and xylenes, and gasoline range organics (GRO) using EPA Method 8260B. Tables 5 and 6 present the results of confirmation samples and comparison with the cleanup goals for TPH and VOCs. Appendix A-3 contains the laboratory reports.

#### **4.5 Photo Documentation**

Appendix D contains photo documentation of the three open excavations after excavation had ceased.

#### **4.6 Backfilling**

Backfilling of the excavations will be conducted after approval by the RWQCB of reuse of specific clean or treated soil piles.

#### **4.7 Summary of Site-Wide Excavations**

This Confirmation Report represents the second set of completed site excavations, following the earlier Phase I Excavations #3, #4, #5, and #14. Table B-3 in Appendix B presents a site-wide summary of excavation volumes and status.

## 5.0 CONCLUSIONS AND RECOMMENDATIONS

The results of confirmation sampling in Excavations #1, #2, and #8 indicate that all final in-situ confirmation samples concentrations of TPH and VOCs were below cleanup goals. The results of the clean soil stockpiles confirmation samples indicate that all concentrations of TPH and VOCs were below the strictest cleanup goals. The results of treated soil piles sampling indicated that some sections of treated soil piles are acceptable for backfilling at any depth, and that some sections of treated soil stockpiles are appropriate for re-use at shallower depths or require additional treatment.

Based on the results of stockpiles and excavations confirmation sampling, DLA Energy requests the RWQCB approve using soil from the stockpiles C-CS-11-EX19-SP01 and C-CS-13-EX16-SP01 as backfill for any excavations and that treated Stockpiles be handled as follows:

Powerine-D-01: removal of northern section for re-treatment, segregation of 4 sections for shallow backfill, and remainder of the soil used for deep backfill;

Powerine-C-01: removal of four sections for re-treatment, and remainder of the soil used for shallow backfill.

Powerine-B-01: segregation of 4 sections for shallow backfill, and remainder of the soil used for deep backfill; and

Powerine-A-01: segregation of 1 section for shallow backfill, and remainder of the soil used for deep backfill.

 Powerine Treatment Soil Pile C-01 Sampling Location Diagram

Treatment Row ID: POWERINE-C-01  
 Date of Final Confirmation Sampling: 07/16/2015

**Notes:** Samples in **turquoise** shaded cells were obtained from the middle of the pile via access through the side.  
 All other samples were obtained from a depth ≈ 3ft into the pile.  
 Samples with **green** font contain hydrocarbon below deep cleanup goals.  
 Samples with **purple\*** font contain hydrocarbon below shallow cleanup goals.  
 Samples with **red\*\*** font contain hydrocarbon above all cleanup goals.  
 Sample ID #s begin with T000.  
 Confirmation Samples Total = 35.

Figure 5C  
 Powerine Treatment Soil Pile B-01 Sampling Location Diagram

Treatment Row ID: POWERINE-B-01  
 Date of Final Confirmation Sampling: 07/20/2015

**Notes:**  
 Samples in **turquoise** shaded cells were obtained from the middle of the pile via access through the side.  
 All other samples were obtained from a depth ≈ 3ft into the pile.  
 Samples with **green** font contain hydrocarbon below deep cleanup goals.  
 Samples with **purple\*** font contain hydrocarbon below shallow cleanup goals.  
 Sample ID #'s begin with T000.  
 Confirmation Samples Total = 35.

Notes: Initial Samples were reported in even Carbon Chain ranges, and C6-C12, C13-C22, C-23-C32, C33-C44 and C23-C44 were calculated; later TPH ranges were reported directly by laboratory.  
 All concentrations are presented in milligrams per kilogram (mg/kg).  
 Detections are shown in **bold**.  
 feet bgs = feet below ground surface.  
 C13-C22 = carbon chains ranging from C13 through C22.  
 TPH = total petroleum hydrocarbons.  
 <1.0 = not detected at or above the indicated laboratory reporting limit.  
 --- = not applicable.  
 Hydrocarbon Chain Identification by EPA Method 8015B(M).  
 TPH GRO Identification by EPA Method 8260B/5035.

Notes: All concentrations are presented in milligrams per kilogram (mg/kg).  
 Detections are shown in **bold**.  
 ft bgs = feet below ground surface.  
 C13-C22 = carbon chains ranging from C13 through C22.  
 TPH = total petroleum hydrocarbons.  
 <1.0 = not detected at or above the indicated laboratory reporting limit.  
 --- = not applicable.  
 Hydrocarbon Chain Identification by EPA Method 8015B(M).  
 GRO by EPA Method 8260B/5035.

Notes: All concentrations are presented in milligrams per kilogram (mg/kg).  
Detections are shown in **bold**.  
ft bgs = feet below ground surface.  
<0.050 = not detected at or above the indicated laboratory reporting limit.  
The cleanup goal (0.5 - 5 feet below ground surface) for Xylenes (o-Xylene + m,p-Xylenes) = 3.77 mg/kg.  
The cleanup goal (> 5 feet below ground surface) for Xylenes (o-Xylene + m,p-Xylenes) = 2.76 mg/kg.  
Volatile Organic Compounds Identification by EPA Method 8260B/5035.  
GRO by EPA Method 8260B/5035.

Notes: Initial Samples were reported in even Carbon Chain ranges, and C6-C12, C13-C22, C-23-C32 and C33-C44 were calculated; later TPH ranges were reported directly by laboratory.  
 All concentrations are presented in milligrams per kilogram (mg/kg).  
 Detections are shown in **bold**.  
 ft bgs = feet below ground surface.  
 C13-C22 = carbon chains ranging from C13 through C22.  
 TPH = total petroleum hydrocarbons.  
 <1.0 = not detected at or above the indicated laboratory reporting limit.  
 --- = not applicable.  
 Hydrocarbon Chain Identification by EPA Method 8015B(M).  
 GRO by EPA Method 8260B/5035.

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331335 / 5E06003**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 05/06/15 13:33 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331362 / 5E29013**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 05/29/15 15:30 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331333 / 5E01006**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 05/01/15 16:09 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331364 / 5F03001**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 06/03/15 07:41 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

### Special Notes

[1] = \*\* : Exceeds upper control limit

[2] = \*\*\* : Exceeds lower control limit

[3] = **S-GC** : Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).

Gasoline Range Organics (GRO) concentration represents the C4-C12 carbon range.

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331363 / 5F02002**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 06/02/15 11:30 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331420 / 5G16003**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 07/16/15 07:54 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007**

**A5331421 / 5G16009**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 07/16/15 14:32 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile

Operations Manager

### Special Notes

- [1] = \*\* : Exceeds upper control limit
  
- [2] = E : The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate (CLP E-flag).
  
- [3] = QM-07 : The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
  
- [4] = S-GC : Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).

Gasoline Range Organics (GRO) concentration represents the C4-C12 carbon range.

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331422 / 5G21011**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 07/21/15 10:06 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

### Special Notes

- [1] = \*\* : Exceeds upper control limit.
- [2] = \*\*\* : Exceeds lower control limit.
- [3] = AA-C1 : RPD exceeds upper control limit.
- [4] = AA-C1 : RPD exceeds upper limit.
- [5] = S-GC : Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).

Gasoline Range Organics (GRO) concentration represents the C4-C12 carbon range.

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331296 / 5D08013**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 04/08/15 16:38 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331341 / 5E11017**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 05/11/15 14:02 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331389 / 5F29020**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 06/29/15 15:40 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331393 / 5G02004**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 07/02/15 07:45 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331283 / 5C25030**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 03/25/15 16:03 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

### Special Notes

- [1] = \*\* : Exceeds upper control limit
- [2] = QM-07 : The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
- [3] = S-GC : Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007**

**A5331284 / 5C27002**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 03/27/15 13:17 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile

Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331398 / 5G02012**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 07/02/15 07:45 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007**

**A5331297 / 5D08014**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 04/08/15 16:38 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile

Operations Manager

**Re : DFSP Norwalk Soil Remediation / 04-NDLA-007  
A5331396 / 5G02007**

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 07/02/15 07:45 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile  
Operations Manager

Note: By relinquishing samples to American Analytix, client agrees to pay for the services requested on this chain of custody form and any additional client-requested analyses performed on this project. Payment for services is due within 30 days from the date of invoice. Sample(s) will be disposed of after 45 days following the submittal of the sample(s) to American Analytix.

**APPENDIX B**

**SITE-WIDE SUMMARY OF CLEAN SOIL STOCKPILES**

**TABLE 1**

**Summary of Phase 1 Clean Soil Stockpile**

<b>Stockpile Number</b>	<b>Initial Volume (yds<sup>3</sup>)</b>	<b>Confirmation Sampling Status</b>	<b>Residual Volume (yds<sup>3</sup>)</b>	<b>Comments</b>
C-CS-1-EX14-SP01	933	Approved for back filling-used for backfill of excavations 3, 4, 5, and 14	0	Used for Phase 1
C-CS-02A-EX11-SP01	900	Approved for back filling-used for backfill of excavations 3, 4, 5, and 14	900	Unused
C-CS-10-EX05-SP01	600	Approved for back filling-used for backfill of excavations 3, 4, 5, and 14	0	Used for Phase 1
C-CS-12-EX19-SP01	4,550	Approved for back filling-used for backfill of excavations 3, 4, 5, and 14	1,150	Partially Used for Phase 1
C-CS-14-EX26-SP01	2,460	Approved for back filling-used for backfill of excavations 3, 4, 5, and 14	2,460	Unused
<b>Total Volume</b>	<b>9,443</b>		<b>4,510</b>	

**Notes:**

yds<sup>3</sup> = cubic yards

**TABLE B-2**

**Site-Wide Summary of Treated Soil Stockpile**

<b>Stockpile Number</b>	<b>Stockpile Volume (yds<sup>3</sup>)</b>	<b>Confirmation Sampling Status</b>	<b>Comments</b>
Powerine-D-01	815	35 Samples 7-15-2015: 31 sections under deep cleanup goals; 4 sections under shallow cleanup goals; 1 section with VOCs above cleanup goals	4 sections selectively separated for shallow backfilling, northern section of pile marked for re-treatment
Powerine-C-01	855	35 Samples 7-16-2015; 4 sections above cleanup goals; 9 sections under deep cleanup goals; remaining sections under shallow cleanup goals	4 sections separated for re-treatment, assign all remaining pile for shallow backfill only.
Powerine-B-01	918	35 samples 7-30-2015: 31 sections under deep cleanup goals; 4 sections under shallow cleanup goals	4 sections selectively separated for shallow backfilling
Powerine-A-01	984	35 samples 7-30-2015: 34 sections under deep cleanup goals; 1 section under shallow cleanup goals	1 section selectively separated for shallow backfilling
<b>Total Volume</b>		<b>3,572</b>	

**Notes:**

yds<sup>3</sup> = cubic yards

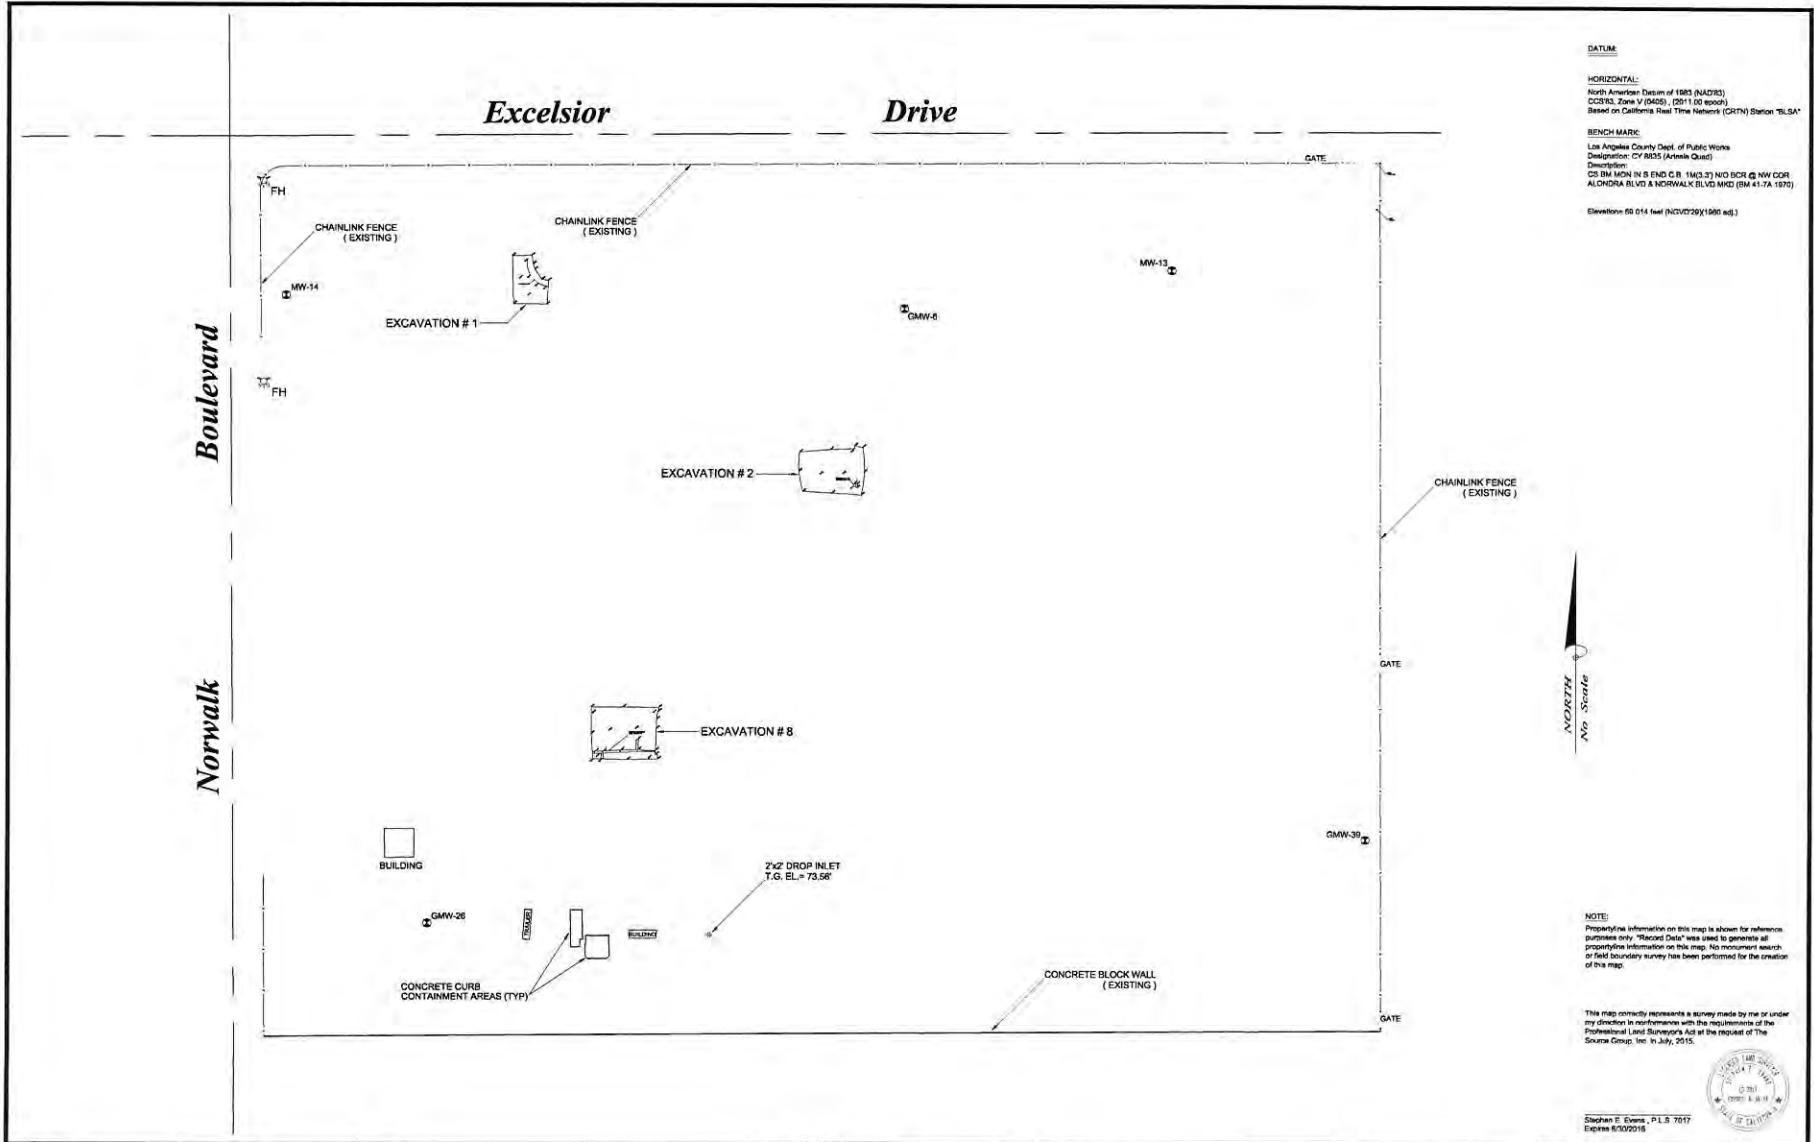

**TABLE B-3****Site-Wide Summary of Excavations**

<b>Excavation Number</b>	<b>Excavation Volumes (yds<sup>3</sup>)</b>	<b>Status (July 23, 2015)</b>	<b>Comments</b>
Excavation #1	556	Backfill approval pending	
Excavation #2	1,095	Backfill approval pending	
Excavation #3	1,042	Backfill approved - in progress	Excavations #3, #4, and #14 combined
Excavation #4	1,845	Backfill approved - in progress	Excavations #3, #4, and #14 combined
Excavation #5	340	Backfill approved - in progress	Excavations #3, #4, and #14 combined
Excavation #8	1,303	Backfill approval pending	
Excavation #14	2,112	Backfill approved - in progress	
<b>Total Volume</b>	<b>8,293</b>		

**Notes:**yds<sup>3</sup> = cubic yards

**APPENDIX C**

**EXCAVATIONS #1, #2, AND #8 SURVEY DATA**

**DATUM**  
**HORIZONTAL:**  
 North American Datum of 1983 (NAD83)  
 COCSIL Zone V (NAD83), (2011.00 epoch)  
 Based on California Real Time Network (CRTN) Station "LSA"  
**BENCH MARK:**  
 Los Angeles County Dept. of Public Works  
 Designation: CV 8355 (Avenue Quad)  
 Description:  
 C/S BM MON IN S END C.B. 1(M3.3) NIO BOR @ NW COR  
 ALONDRA BLVD & NORWALK BLVD MKD (BM 41-7A-1973)  
 Elevation: 66.014 feet (NCV029)(1985 eq.)

**NOTE:**  
 Property line information on this map is shown for reference purposes only. "Record Data" was used to generate all property information on this map. No monument search or field boundary survey has been performed for the creation of this map.

This map correctly increments a survey made by me or under my direction in performance with the requirements of the Professional Land Surveyor's Act at the request of The Source Group, Inc. on July, 2015.
