SUBJECT: APPROVAL OF UPDATED WORKPLAN FOR POST-EXCAVATION SOIL GAS SAMPLING

CASE/SITE: DEFENSE FUEL SUPPORT POINT NORWALK, 15306 NORWALK BOULEVARD, NORWALK, CALIFORNIA (SCP NO. 0286A, SITE ID NO. 16638)

Dear Mr. Carros:

On March 2, 2016, the California Regional Water Quality Control Board (Regional Board) received a technical document titled *Updated Workplan for Post-Excavation Soil Gas Sampling* (Workplan), prepared by The Source Group, Inc. (SGI), on behalf of the Defense Logistics Agency, for the above referenced site (Site). This Workplan proposes to install additional soil gas probes for a soil gas survey after backfilling of treated soil. On February 6, 2015, the Regional Board enrolled the Site in General Waste Discharge Requirements (GWDR) Order No. 90-148 for onsite bioremediation treatment of contaminated soil with petroleum hydrocarbons and its reuse.

The proposed soil gas survey network includes one soil gas location per quarter acre, corresponding to approximately 5 sampling locations per former petroleum tank storage basin. At each sampling location, soil gas probes will be installed at a depth of 5 feet, 10 feet, and 15 feet below surface grade. The soil gas survey will be consistent with the July 2015 Active Soil Gas Advisory published by California Environmental Protection Agency. All soil gas samples collected will be analyzed by Method TO-15.

We have reviewed the Workplan and concur with the proposed soil gas sampling at the Site. Submit a soil gas sampling report with conclusions and recommendations to the Regional Board by **June 15, 2016**.

If you have any questions, please contact Mr. Paul Cho at (213) 576-6721 or paul.cho@waterboards.ca.gov.

Sincerely,

Paul Cho, P.G.
Site Cleanup Unit V
